

Mengganti Port SSH di FreeBSD

Secara default port freebsd adalah port 22, demi keamanan freebsd kita dari hal-hal yang tidak kita inginkan sebaiknya kita ganti port freebsd tersebut.

Buka file konfigurasi sshd (yaitu sshd_config) :

```
ee /etc/ssh/sshd_config
```

- Temukan baris berikut:

Port 22

- Ubah port 22 menjadi Port yang di inginkan misalnya port 50123

```
====line 17 col 10 lines from top 17 =====
#      $FreeBSD: releng/10.3/crypto/openssh/sshd_config 296853 2016-03-14 13:05

# This is the sshd server system-wide configuration file.  See
# sshd_config(5) for more information.

# This sshd was compiled with PATH=/usr/bin:/bin:/usr/sbin:/sbin

# The strategy used for options in the default sshd_config shipped with
# OpenSSH is to specify options with their default value where
# possible, but leave them commented.  Uncommented options override the
# default value.

# Note that some of FreeBSD's defaults differ from OpenBSD's, and
# FreeBSD has a few additional options.

Port 50123
#AddressFamily any
```

Setelah itu save dan restart ssh freebsd anda

```
# service sshd restart
```

atau

```
# /etc/rc.d/sshd restart
```

Selamat mencoba !!!
